Classic Enhancements

Geared to deliver distinctive visual impact, superior functionality, design flexibility and elegance, these accessories bring a whole new dimensional appeal to any Nomadic 8' or 10' Instand Classic exhibit or hybrid system. These accessories provide the ability to accommodate new design possibilities that differ from all other pop-up displays.

Monitor Bracket and Keyboard Shelf

An all-steel construction with easy set-up, the monitor bracket attaches to the front of an Instand Classic concave frame and supports any LCD or flat screen monitor up to 24 inches. Accommodating all types of computer keyboards for product demonstrations, this frosted acrylic keyboard shelf is designed to accommodate up to 10 lbs. and measures 12.9" x 27.6".

Profile Header

Built to spotlight any brand or logo. Profile headers measuring up 19.5" x 31.5" may be packed in a ShowMate case.

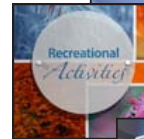

Backlighting for Profile Headers

Illuminate messages for greater impact and stunning visibility by hanging a fluorescent tube light from the stiffener behind a profile header.

Stand Off Graphic Signage

Mount single, custom-cut stand off signs anywhere on the display. Or attach stand off graphic signs, in a variety of configurations.

Suspended Cable

Mount custom-cut graphic signage that cascades from stainless steel wires.

Downlit Sconce Lighting

Draw attention to suspended cable signage with a sophisticated accent light.

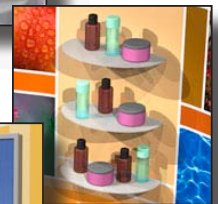

Product Shelf

Individual frosted acrylic shelves float on the backwall and provide ample space for product display. Each shelf accommodates a center load of up to 10 lbs.

Ladder Shelves

For real retail impact, stack up to 3 frosted acrylic shelves at locations you specify along a 32" ladder. Each shelf accommodates a center load of up to 10 lbs.

Light Panel

Super slim and lightweight, we introduced it at Exhibitor Show for DesignLine. Now Instand clients can take advantage of this completely self-contained, energy efficient cold cathode fluorescent unit to vividly backlight a 22" w x 31" h graphic.
